Coriolis Mass Flow

Cost: \$2060 per person

Location: GCTI and other potential locations

Meals provided: breakfast & lunch

Description:

This Coriolis Mass Flow Course will start by providing maintenance and engineering personnel with a basic understanding of the Coriolis principle. This basic portion will focus on concepts applicable to virtually any manufacturer's equipment. Following this introduction, the course will proceed with in-depth training on density and concentration measurements. The course combines classroom and hands-on training at the GCTI Advanced Process Training Units with online instrumentation and controls.

Length: 1 day course

Time: 9:00 AM - 4:30 PM

Specific topics covered:

- Flow Overview
- Field Tooling
- Coriolis Basics
- Applications
- Entrained Air
- Density Measurements
- Zero Points
- Proper mass flow installation
- Set up and commission of Coriolis flow meters
- Use on-board and pc-based instruments to set up and verify health of interfaces and signals
- Troubleshooting and Repair

2026 Course offerings (all times are 9:00 a.m. to 4:30 p.m.):
