Interface Level Measurement

Cost: \$2760 per person

Location: GCTI and other potential locations

Meals provided: breakfast & lunch

Description:

This Interface Level Measurement Training Course will start by providing maintenance and engineering personnel with a basic understanding of level measurement technologies best suited for interface level measurement. DP Level and Capillary measurement techniques. Following this introduction, the course will proceed with in-depth theoretical and hands-on training on both DP Level and Capillary measurement techniques. This will include intensive hands-on experience in instrument configuration of each of these technologies. The Advanced Interface configuration portion of the course includes optimization techniques for accurately determining interface level in 2 fluid applications, specifically on oil and water combinations.

Following the Advanced configuration exercises, the course looks deeper at interface measurement troubleshooting techniques to complete the interface training program. The course combines classroom and hands-on training on the GCTI Advanced Process Training Units with online instrumentation and controls and specifically on our separator training module.

Length: 2 day course

Time: 9:30 AM - 4:30 PM

Specific topics covered:

- Theory of Interface Measurement
- DP Level and Capillary measurement techniques
- Guided Wave RADAR
- Instrument Configuration
- Advanced Interface Measurement Configuration
- Troubleshooting exercises and techniques

2026 Course offerings (all times are 9:30 a.m. to 4:30 p.m.):

June 15th – 16th

Aug. 10th – 11th

Sept. 14th – 15th

Oct. 5th – 6th
